Volume 12, no. 6, e02206-21, 2021, <https://doi.org/10.1128/mBio.02206-21>. The first error regards Table 3, which was published with a wrong title. The correct title is “K_i concn (mM) ± SD^a.” Second, in the originally published Fig. 5d, the proportions of consumed glucose, xylose, and cellobiose cannot be distinguished from the proportions of glucose, xylose, and cellobiose which have not been processed. The corrected Fig. 5d, with improved colors to facilitate the visualization, appears below. There are no corresponding changes to the text of the figure legend.
